PROFESSIONAL SUMMARY

Backend developer with a passion for building scalable backends, APIs, and AI-powered systems. Over the past year, I've gone from mastering core Java and Spring Boot to designing and implementing a complete e-commerce backend (with JWT authentication and role-based access control) and an AI support automation platform that integrates DeepSeek AI, n8n workflows, Zendesk, and Slack. I thrive on ownership, reliability, and continuous learning — I'm the person you can count on when systems need to work. Currently exploring backend architecture, AI integration, and cloud-native development with a focus on delivering real-world impact in tech-driven industries like healthcare and fintech.

WORK EXPERIENCE

AI Support Automation

April 2026 – May 2026

Freelance · Accra, Ghana

AI Support Automation Platform

Freelance | 2026

Designed and built an end-to-end AI-powered support automation system that processes customer tickets, analyzes sentiment, and orchestrates multi-channel responses — and as a result reduced manual support workload by automating 80% of ticket triage and improved response times from hours to minutes.

Key Contributions:

- Developed a **Spring Boot REST API** that receives support tickets and integrates with **OpenAI/DeepSeek AI** for real-time sentiment analysis, categorization, and priority detection
- Built **n8n automation workflows** that automatically create tickets in **Zendesk**, send real-time alerts to **Slack**, and trigger personalized email responses
- Implemented **Docker containerization** for consistent development and production environments
- Set up **CI/CD pipelines with GitHub Actions** for automated testing and deployment

Technologies Used: Java 21, Spring Boot 3, DeepSeek AI, n8n, Zendesk API, Slack API, Docker, GitHub Actions, MySQL, REST APIs

Backend Engineer

February 2026 – April 2026

Freelance · Accra, Ghana

E-Commerce Backend System

Freelance | 2026

Designed and implemented a production-ready e-commerce backend using Spring Boot and MySQL. The system handles product management, user authentication, order processing, and payment integration — serving as the foundation for a complete online store.

Key Features:

- RESTful APIs for product catalog, shopping cart, and order management
- JWT-based authentication and role-based authorization (Admin, Customer)
- MySQL database with JPA/Hibernate for ORM and Flyway for version-controlled schema migrations
- Secure payment processing with Paystack integration
- Railway and Git/GitHub for version control, consistent development and deployment

Technologies Used: Java 21, Spring Boot 3, Spring Security, JWT, MySQL, JPA/Hibernate, Flyway, Git, REST APIs

Web Developer(Personal Portfolio)

September 2025 – October 2025

Self Employed · Accra, Ghana

Portfolio Website

Personal Project | 2025

Built a responsive portfolio website to showcase my projects, technical skills, and professional journey. The site serves as a central hub for my work — including the **AI Support Automation Platform**, **e-commerce backend**, and other development projects. Used **Git/GitHub** for version control and documentation of technical decisions throughout the development process.

Key Contributions:

- Designed and developed a fully responsive portfolio using **HTML, CSS, and JavaScript**
- Documented projects, technical decisions, and architecture choices
- Maintained version control with Git/GitHub for all code changes
- Published live at: <https://eddiea21.github.io/Eddiesportfolio/>

EDUCATION

BSc Computer Science

Feb 2024 – Aug 2027(Expected Graduation)

Ghana Communication Technology University · Accra, Ghana

Relevant Coursework: Software Engineering, Database Systems, Web Development, Data Structures & Algorithms, Operating Systems, Computer Networks, AI and Automation, Critical Thinking

ORGANIZATIONS

Intern

Jan 2026 – Mar 2026

Ghana Communication Technology University · Accra, Ghana

Supported the university's IT department in developing internal tools and maintaining existing systems. Worked on small-scale projects to automate administrative tasks and improve operational efficiency. Collaborated with senior developers to learn best practices in software design and implementation.

PROJECTS

E-Commerce Backend System

Feb 2026 – April 2026

Freelance

Project: Designed and implemented a production-ready e-commerce backend with REST APIs for product management, user authentication, order processing, and secure payment integration.

Impact: Provides a scalable foundation for an online store, handling user accounts, product catalogs, shopping carts, and payment processing with JWT-based security and role-based access control.

Technologies: Java, Spring Boot, Spring Security, JWT, MySQL, JPA/Hibernate, Flyway, Docker, Paystack API, REST APIs

My Personal Portfolio

Sept 2025 – Oct 2025

Personal Project

Project: Built a responsive personal portfolio website to showcase my projects, technical skills, and professional journey. The site serves as a central hub for my work and technical documentation.

Impact: Establishes my online presence as a developer, documents my learning journey, and provides a platform to share my projects with potential employers and collaborators.

Technologies: HTML5, CSS3, JavaScript, Git, GitHub Pages, Responsive Design

SKILLS

Java — SpringBoot/REST API	●●●●○ Proficient
MySQL — JPA/Hibernate	●●●○○ Competent
Git — GitHub	●●●○○ Competent
Linux	●●●○○ Competent
AI Integration — OpenAI/DeepSeekAI	●●●○○ Competent
Slack	●●●○○ Competent
Zendesk	●●●○○ Competent
Automation — n8n	●●●○○ Competent
Docker	●●○○○ Amateur
AWS/Railway	●●○○○ Amateur
CI/CD	●●○○○ Amateur
